Tina bought a handbag for $92. She had a discount of 25%. The tax was 7.5%. How much was the discount? How much was the tax? What was her final bill?

The ratio of lions to zebras is 3 to 14. On a safari, Lena saw 136 lions and zebras altogether. How many were lions? How many were zebras?

Order from least to greatest:
$$2, -\frac{3}{8}, -1\frac{2}{5}, -1.35, 0.6, -0.25$$

If 15 boys make up 30% of the 1st grade. How many students are there in the whole 1st grade?

The ratio of apples to oranges is 2:5. If there are 48 apples in the basket, how many oranges are there?

Jane sells oranges. Each orange costs $2.5. Write an equation that represents how much she makes in a day. Find out how much she makes if she sells 12, 15, 25, and 30 oranges. Label your dependent and independent variables. Graph.
